New M18 FUEL™ Compact Vacuum Provides Ultimate Versatility, Exclusive Two-Stage Debris Separation System

MILWAUKEE, WI- Milwaukee Tool is excited to introduce a new jobsite clean-up solution that offers powerful performance and ultimate versatility to excel in small-area and spot clean-up applications. The M18 FUEL™ Compact Vacuum delivers up to 50% more sustained suction than many other cordless compact vacuums currently available through an exclusive two-stage debris separation for the most efficient clean-up experience. In addition, five dedicated solutions (powered floor tool, floor tool, crevice tool and flexible hose, brush tool, and utility tool) allow this vacuum to tackle almost any obstacle.

Optimized for dry jobsite debris, the M18 FUEL™* Compact Vacuum features a POWERSTATE™ brushless motor that provides powerful performance ideal for small area and spot clean up applications. For more efficient clean-up, the vacuum is engineered with proprietary two-stage debris separation functionality. This process divides small and large debris within the cannister prior to entering the filter for sustained suction.

Professionals need to be able to clean in a wide range of environments including debris at ground-level, confined spaces, waist level, and overhead. To ensure these users have the very best solution for whatever clean-up solution they encounter, the M18 FUEL™ Compact Vacuum comes fully equipped with five dedicated solutions including a powered floor tool, a floor tool, a brush tool, a utility tool, and a crevice tool with a flexible hose to fit a variety of

applications. For optimal dust and microparticle collection, the vacuum comes with an included washable HEPA filter and foam pre-filter.

When equipped with the M18™ REDLITHIUM™ XC5.0 Battery Pack, the vacuum can run up to 18 minutes in High Mode and 28 minutes in Low Mode.

Milwaukee is committed to improving productivity by providing performance-driven and trade-focused solutions so users can perform an entire day's work on one battery system. The new M18 FUEL™ Compact Vacuum is fully compatible with the entire M18™ line and is a true testament to Milwaukee's focus on investing in game-changing technology that delivers breakthrough solutions for users.

**M18 FUEL™ is engineered for the most demanding tradesmen in the world. Delivering unrivaled performance, all M18 FUEL™ products feature three Milwaukee®-exclusive innovations—The POWERSTATE™ Brushless Motor, REDLITHIUM™ Battery Pack and REDLINK PLUS™ Intelligence Hardware and Software—that deliver unmatched power, run-time and durability on the jobsite. Simply put, M18 FUEL™ tools are the most powerful 18V cordless tools in their class.*

Specifications:

M18 FUEL™ Compact Vacuum (0940-20)

Air Volume: 32 CFM

Sealed Suction: 80" H2O

Air Performance: 98 Air Watts

Canister Capacity: 0.25 Gallons

Inlet Diameter: 1-1/4"

Height: 11.65"

Length: 13.07"

Width: 6.39"
