

## The Hunter Quick Pit solution is now available to shops who would like unmanned inspection equipment

Nov. 2, 2020

ST. LOUIS – Shops who invest in Hunter’s unmanned inspection equipment now can take advantage of the Hunter Quick Pit; a new single-pour solution that simplifies the concrete work to install Hunter inspection equipment.

Hunter’s Quick Pit was created to minimize disruption to shops’ service drive during installation of inspection equipment. During the installation process, a service drive can go from floor-cut to smooth concrete in as little as eight hours. Timed right, service lanes can be running new Hunter inspection equipment within little to no downtime.

### About Hunter’s [Unmanned Inspection System](#):

With Hunter’s unmanned inspection system, Quick Check Drive® and Quick Tread Edge®, shops can effortlessly boost alignment and tire sales.

With Quick Tread Edge®, service providers can maximize tire sales and provide customers with informative, in-depth inspection results. Paired with Quick Check Drive, Hunter’s touchless alignment inspection system, automatic alignment and tire readings are captured in seconds. The system can cycle passenger-car vehicles through every 3-5 seconds.

Hunter Engineering Company® is the global leader in wheel and tire service, alignment systems, brake service and inspection lane equipment. Hunter® equipment is approved and used by vehicle manufacturers, automobile and truck dealers, tire dealers and service facilities around the world.
